

Criterion 7.3.1

Institutional Distinctiveness

LCB College has prioritized the holistic development of students as stated in the vision of the college. In the light of the priority as mentioned, significant efforts were made by the college management in diverse dimensions to ensure the best of facilities and beyond. This consists of provisioning of platforms to the students to pursue their fields of interests on one hand, yet ensuring strict disciplinary rules on the other for all stakeholders. Besides augmenting its infrastructure, with state-of-the-art laboratory, emphasis has been placed on up-gradation of the central library, provision of a fully furnished and hygienic canteen, ensuring a disabled friendly campus; landscaping and potted plants and medicinal herbs are used to augment the green cover. The approach is not restricted only to infrastructure up-gradation though it is one of the important pillars for providing the necessary environment for students. The College has also designed ways like constitution of various clubs with student's members and organizing of events relevant to it to provide the said platform to students. The College has framed various disciplinary rules to ban the use of tobacco products for all its stakeholders, ethics maintenance and also stringent measures are taken for assuring regularity of students. Maintenance of strict discipline is evidence of the commitment of the college management. This is envisioned to ensure that the students are always committed to their goals.
